

THE MOST ACCURATE BED BUG DETECTION TOOL AVAILABLE!

Certified by the National Entomology
Scent Detection Canine Association

Detect LIVE BED BUGS & EGGS, within minutes.

- Extremely high-level of accuracy, same as bomb-sniffing dogs.
- Regular canine inspections prevent tenant complaints and reduce long-term remediation costs.
- Earlier detection leads to lower remediation costs.

K-9 INSPECTION ADVANTAGES

SAVES MONEY

- The only 'tool' that accurately detects ALL STAGES of LIVE BED BUGS by their scent.
- They can search an entire hotel room in 2-3 minutes with extreme accuracy.
- A regular inspection program can reduce risk of financial impact and damage to brand reputation.
- Early detection can lead to lower remediation costs.

PEACE OF MIND

- If bed bugs are present, we can contain them before they become established.
- An inspection following a treatment can confirm that all bed bugs have been eliminated.

PROVEN SUCCESS

- Dogs have been used for years to detect bombs, drugs, termites and more with their keen sense of smell.
- They can accurately detect a scent through mattresses, inside furniture, walls and more.
- Dogs that are part of a properly trained and certified team, are recognized in court as 'scientific instruments'.

ROSE K-9 TEAM ADVANTAGES

ENTOMOLOGIST DEVELOPED PROGRAMS

The Rose K-9 Team program is developed and supervised by the Board Certified Entomologists at Rose.

- Rose staff Entomologists continue to research the latest techniques and develop specific programs that are proven effective against bed bug infestations.
- If bed bugs are found, we will work with you to determine the optimal solution for resolving your problem.

NESDCA CERTIFICATION

WHY IT'S IMPORTANT TO YOU

This third party accreditation ensures that our bed bug scent detection dogs alert ONLY to LIVE BED BUGS and LIVE BED BUG EGGS.

- Rose dogs and their handlers are re-certified annually through both NESDCA and Rose Pest Solutions.
- For more information visit: <http://www.nesdca.com>.

COMPARE: HUMAN - VS - CANINE BED BUG INSPECTION

PEST MANAGEMENT PROFESSIONAL	CANINE DETECTION
15-20 minutes or more per room to inspect.	1-2 minutes per room to inspect.
Disruptive; must pull apart beds, remove headboards, move furniture, etc.	Minimal to no disruption. Room is left intact.
Limited to visual detection, hidden bed bugs will be missed.	Can detect unseen bed bugs by scent; inside mattresses, upholstered furniture, cracks, crevices.

ESTABLISHED BED BUG DIVISION

We created our Canine Bed Bug division in 2011 with two trained bed bug sniffing dogs. Since then we've added six more teams. Our eight active canine teams have been trained using the same methodology and regimen as dogs trained to detect bombs, drugs and termites.

Our handlers and dogs are trained and certified as a team. Each team is required to pass an annual test in order to maintain certification. Our dogs are trained to detect live bed bugs and can detect bed bug eggs the size of a grain of salt.
