ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Runoff of this product will be reduced by avoiding applications when rainfall is likely to occur within 24 hours. Do not apply to any impervious surfaces which may contact or lead directly to surface water, storm drains, or urban runoff conveyance systems (gutters).

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

Advion® Cockroach Bait Arena contains cockroach bait material that contains the active ingredient indoxacarb, an insecticide that acts through ingestion by cockroaches. The activity of this insecticide allows adequate consumption of the bait by cockroaches prior to onset of mortality.

Advion Cockroach Bait Arena can be used indoors to control cockroach populations. Arenas should be placed in/or near cockroach harborage areas or areas known to be frequented by cockroaches.

Outdoors, bait arenas should be placed adjacent to structures.

INSECT RESISTANCE MANAGEMENT

INDOXACARB GROUP 22A INSECTICIDE

For resistance management, Advion Cockroach Bait Arena contains a Group 22A insecticide. Any insect population may contain individuals naturally resistant to Advion Cockroach Bait and other Group 22A insecticides. The resistant individuals may dominate the insect population if this group of insecticides are used repeatedly in the same treated areas. Appropriate resistance-management strategies should be followed.

To delay insecticide resistance, take the following steps:

- Rotate the use of Advion Cockroach Bait Arena or other Group 22A insecticides with different groups that control the same pests.
- Adopt an integrated pest management program for insecticide use that includes scouting, uses historical information related to pesticide use, record keeping, and which considers cultural, biological, and other chemical control practices.
- Monitor after application for unexpected target pest survival. If the level of survival suggests the presence of resistance, consult with your local university specialist or certified pest control advisor.
- Contact your local Syngenta representative, retailer, or extension specialist for any additional pesticide resistance-management and/or IPM recommendations for the specific site and pest problems in your area.
- For further information or to report suspected resistance contact Syngenta at 1-866-SYNGENT(A) (866-796-4368).

Syngenta encourages responsible product stewardship to ensure effective long-term control of the insects on this label.

SPECIFIC USE DIRECTIONS

1. Thoroughly inspect infested area to determine proper Advion Cockroach Bait Arena placement and number of arenas necessary to treat the area.
2. Enough arenas must be used to provide adequate bait to control the cockroach populations present. Recommended placements: Place 3-10 bait arenas per 100 linear feet of horizontal surface primarily around wall perimeters and other areas away from walls such as but not limited to, around centrally located island sinks, cabinets, and appliances. Place maximum number of arenas with heavy cockroach infestations.
3. Place Advion Cockroach Bait Arena in areas where cockroaches frequent such as along walls or corners, under or near kitchen appliances and industrial equipment, under sinks, in cabinets, and utility areas.
4. Each Advion Cockroach Bait Arena may be placed on a vertical or horizontal surface using an adhesive.
5. Inspect arenas periodically and replace depleted bait arenas as needed based on severity of the initial cockroach infestation and a continuing control program. For arenas placed outdoors, replace every 3 months, or sooner if arena becomes depleted of bait.
6. Avoid direct contact of Advion Cockroach Bait Arena with broadcast, spot or crack and crevice directed pest control applications. Do not place bait arenas in locations recently treated with other pest control products as spray residues could render the bait less palatable to cockroaches and reduce effectiveness of the bait arenas.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

Storage: Store in cool, dry place inaccessible to children and pets.

Disposal: If empty, do not reuse/refill this bait arena. Place empty bait arena in trash or offer for recycling if available. If partially filled, call your local solid waste authority or 1-888-638-7668 for disposal instructions.
